

## AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application:

### LISTING OF CLAIMS:

Claim 1. (Currently Amended): A method for organizing a substantial number of compact discs in conjunction with a compact disc changer having slots for receipt of such discs and including unique slot identifiers, said method of organizing comprising:

selecting a plurality of compact discs to be organized in said slots, each of said discs having a title and an associated liner note;

placing said selected compact discs in the respective said slots of said compact disc changer with each of said slots having a unique slot identifier;

providing a display album including a plurality of loose leaf pages having respective storage sleeves at least equal in number, when taken together, to said plurality of compact discs, said sleeves forming pockets with an opening along one side and having a viewing window for viewing of said associated liner note when inserted therein, said pockets including respective unique indicia correlating to the respective said unique slot identifiers of said changer; and

selecting said pockets with respective unique indicia matching the respective said unique slot identifiers of said slots wherein said respective compact discs have been placed and placing said respective associated liners therein;

~~so that a user may determine~~ locating a slot of said compact disc changer having  
~~said slots wherein said~~ a compact disc correlating to a ~~said~~ respective associated  
~~liners liner note have been~~ placed in one of said pockets of said display album compact  
~~disc changer~~ by referring to said unique indicia on the respective said pockets of said  
looseleaf pages in said display album and matching said unique indicia with one of said  
unique slot identifiers on said compact disc changer.

Claim 2. (Withdrawn): An online method of organizing a large collection of  
retrievable compact disc related materials comprising:

selecting a display binder including a plurality of looseleaf sheets, including  
respective pockets having transparent viewing panels and respective identifying indicia  
uniquely associated therewith;

providing an online database structured to store a master listing of compact disc  
titles including the titles of said compact disc related materials;

inserting the respective compact disc related materials into said pockets having  
said identifying indicia;

selecting from said database the title of said compact disc titles to provide a  
collection of titles;

assigning positional identifiers correlating the respective said identifying indicia to  
the respective titles of said collection of titles;

generating a table of contents printout by selecting said collection of titles and  
their respective said positional identifiers; and

attaching said table of contents to said binder whereby a user may view said table of contents, select a desired title and, note the positional identifier associated with said desired title, flip said sheets to select the pocket bearing identifying indicia corresponding with the positional identifier associated with said selected title.

Claim 3. (Withdrawn): The method as set forth in claim 2 further comprising:  
searching said master listing in said database to determine if a selected compact disk title is listed therein;

inserting said compact disc related material associated with said selected new compact disc title in an individual pocket having said identifying indicia;

adding said selected compact disk title to said master listing;

assigning said selected compact disc title a positional identifier matching said identifying indicia;

generating an updated table of contents listing including said new compact disc title and its associated positional identifier; and

inserting said updated table of contents in one of said pockets visible through said viewing panel.

Claim 4. (Withdrawn): The method as set forth in claim 2 wherein:  
said database further includes a track listing associated with said compact disc title.

Claim 5. (Withdrawn): The method as set forth in claim 4 further comprising:  
generating a track listing for at least one compact disc title and inserting said track  
listing in said pocket corresponding to said positional indicator.

Claim 6. (Withdrawn): The method as set forth in claim 2 wherein:  
said looseleaf sheets are subdivided on their respective front and back sides in a 2  
x 2 matrix of said pockets.

Claim 7. (Withdrawn): The method as set forth in claim 2 further comprising:  
searching a remote database for a resulting said compact disc title; and  
adding said resulting compact disc title to said master listing.

Claim 8. (Withdrawn): The method as set forth in claim 2 wherein:  
said compact disc related material is a liner note.

Claim 9. (Withdrawn): The method as set forth in claim 2 wherein:  
said compact disc related material is a compact disc.

Claim 10. (Withdrawn): The method as set forth in claim 3 further comprising:  
automatically updating a counter to generate the next positional indicator for a  
new compact disc title.

Claim 11. (Withdrawn): The method as set forth in claim 2 further comprising:

adding a music category to said database record for each compact disc title.

Claim 12. (Withdrawn): The method as set forth in claim 11 wherein:

said disc category is music, CD, DVD, data, or software.

Claim 13. (Withdrawn): The method as set forth in claim 2 further comprising:

adding a compact disc classification to said database for each compact disc title.

Claim 14. (Withdrawn): The method as set forth in claim 13 wherein:

said compact disc classification is Alt/Indie, Big Band, Blues, Celtic, Christian, Classical, Comedy, Country, Grunge, Heavy Metal, Hip Hop, House, Industrial, Jazz, Kids/Family, Latin, Mood Music, New Age, New Wave, Opera, Pop, Punk, R&B, Rap, Reggae, Rock, Singles, Ska, Soundtracks, Southern Rock, Spoken Word, Swing, Techno, Unplugged/Acoustic, Vocal/Nostalgia, or Unplugged.

Claim 15. (Withdrawn): The method as set forth in claim 2 further comprising:

adding an artist category associated with each said compact disc title in said database.

Claim 16. (Canceled)

Claim 17. (Withdrawn): An organizational display apparatus for use in

conjunction with an online database structured to store a listing of compact disc titles

along with a positional identifier for large numbers of compact discs having an associated liner comprising:

a binder having a spine supporting along a longitudinal margin opposing hingedly attached cover members;

a plurality of looseleaf display pages positioned between said cover members and suspended from said spine, each of said pages including a display section bordering a perforated hinge section, said display section including a front side and a back side separated by a common divider formed of non-woven material for resting against an optical surface of a compact disc and at least one opposing transparent viewing panel open along one edge forming a pocket for insertion of a compact disc related material, the respective said pockets including indicia correlating the respective said pockets to the respective said positional indicators listed in said database associated with the respective titles of said compact disc related materials inserted therein;

a table of contents generated from a subset of said database listing and inserted into at least one of said pockets correlating said compact disc titles with individual ones of said pocket indicia; and

a plurality of post members inserted through said perforated hinge section to releasably secure said pages to said binder in an overlapping arrangement whereby a user may refer to said table of contents listing to locate a selected compact disc title, note said positional identifier, and flip said pages to said pocket having matching indicia to view said compact disc related material inserted therein.

Claim 18. (Currently Amended): A display apparatus for displaying and organizing large numbers of compact discs and their respective liner notes for use in conjunction with a compact disc changer having a plurality of slots with associated unique slot identifiers wherein said compact discs are stored, said display apparatus comprising:

an elongated spine member having an upper flange folded to form an upper rearwardly facing retention recess and a lower flange folded to form a lower rearwardly facing retention recess, said flanges being located at opposing longitudinal margins of said spine;

a first cover member including an innermost end having a first flexible hook ~~for insertion~~ inserted into said upper retention recess from an external spine side direction, said first cover member including a plurality of display sleeves openable at one end and having an outwardly facing transparent viewing surface;

a second cover member including an innermost end having a second flexible hook ~~for insertion~~ inserted into said lower retention recess from an external spine side direction;

said hooks cooperating with said flanges to pivotally attach said cover members to said spine;

a plurality of flexible loose leaf pages having an elongated gutter section positioned between a display section and a perforated hinge section, said display section having at least one side formed with at least one pocket having a non-woven backing and an opposing transparent viewing window for viewing of said ~~pocket contents~~ liner notes

inserted therein, each of said pockets having an a unique indicia ~~for~~ correlating the respective said ~~pocket contents~~ liner notes with the respective said unique slot identifiers corresponding with the respective said slots in said compact disc changer; and

a plurality of detachable post members projecting between said upper flange and said lower flange ~~for~~ securing said first and second cover members to said spine and further passing through said perforated hinge section of each of said pages to releasably secure said pages to said spine and whereby said posts may be disconnected and said perforated hinge section of said looseleaf pages may be inserted thereover and said posts reconnected to secure said pages to said spine member between said first and second cover members and each of said ~~pocket contents~~ liner notes may be inserted into individual a said pockets with said unique indicia correlating to the unique slot identifier of said slot in said compact disc changer wherein said compact disc is stored.

Claim 19. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

each said page includes respective front and back sides having a common central divider and said display sections including a 2 x 2 matrix arrangement of said pockets.

Claim 20. (Previously Presented): The display apparatus as set forth in claim 18 that includes:

twenty-six pages including one of said pages displaying a table of contents and wherein;

said display sections include on their respective front and back sides respective 2  
x1 matrix arrangement of said pockets for receiving selected materials; and  
said pages being 7 and 7/8 inches wide and 10 and 7/8 inches tall.

Claim 21. (Previously Presented): The display apparatus as set forth in claim 18  
that includes:

twenty-six pages including one of said pages displaying a table of contents and  
wherein;

said display sections include on their respective front and back sides respective 1  
x1 matrix arrangement of said pockets for receiving selected materials; and  
said pages being 7 and 7/8 inches wide and 6 inches tall.

Claim 22. (Previously Presented): The display apparatus as set forth in claim 18  
wherein:

said pockets are openable from their respective top sides.

Claim 23. (Previously Presented): The display apparatus as set forth in claim 18  
wherein:

said pockets include a thumb notch providing access to a central aperture of a  
compact disc inserted therein.

Claim 24. (Canceled)

Claim 25. (Canceled)

Claim 26. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

said posts are formed in quarter inch detachable sections.

Claim 27. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

each of said flanges including a flap covering the ends of said posts.

Claim 28. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

said display section of each page includes back to back pockets with a central common divider formed of a non-woven material.

Claim 29. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

said pockets are 5 inches wide by 5 inches high.

Claim 30. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

said gutter section is approximately one inch wide.

Claim 31. (Previously Presented): The display apparatus as set forth in claim 18 that includes:

twenty-six pages including one of said pages dedicated to a table of contents.

Claim 32. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

at least one of said pockets include a table of contents insert listing all compact disc titles having said liner notes stored in said pockets, said listing linking each of said titles to a position of each compact disc in said changer.

Claim 33. (Previously Presented): The display apparatus as set forth in claim 18 wherein:

said pockets are between 2.5 inches to 3.0 inches square.

Claim 34. (Withdrawn): A display apparatus for organizing a large amount of collectible materials for use with a database structured to store a listing of collectible material descriptors describing said collectible materials along with respective corresponding positional identifiers, said display apparatus comprising:

a binder having a spine supporting along a longitudinal margin opposing hingedly attached cover members;

a plurality of display pages suspended from said spine, each of said pages including a display section having at least one transparent viewing panel open along one

edge forming a pocket for insertion of respective said materials, the respective said pockets including indicia correlating the respective said pockets to the respective said positional identifiers listed in said database associated with the respective materials to be inserted in said pockets;

a table of contents generated from said database listing and inserted into at least one of said pockets correlating said material descriptors with individual ones of said pocket indicia; and

an anchoring element to releasably secure said pages to said binder in an overlapping arrangement whereby a user may refer to said table of contents listing to locate a selected material descriptor, note said positional identifier, and flip said pages to said pocket having matching indicia to view said materials inserted therein.

Claim 35. (Currently Amended): A method for organizing a substantial number of collectible materials comprising:

providing a display album including a selected number of looseleaf pages having respective storage sleeves forming pockets with an opening along one side and having a viewing window, said pockets including respective unique indicia;

selecting a plurality of said collectible materials to be organized in said album;

placing selected said collectible materials in respective said pockets such that said collectible materials may be viewed through respective said viewing windows;

generating a table of contents including a listing of material descriptors describing respective said collectible materials and assigning a selected unique positional identifier

to respective said material descriptors corresponding to said respective unique indicia of respective said pockets wherein respective said collectible materials are placed; and

attaching said table of contents to said display album ~~so that a user may determine~~ linking the location of each of said collectible materials in said pockets ~~by referring to~~ with a said unique positional identifier associated with a selected collectible material descriptor in said table of contents ~~and whereby a user may flip to a page having a pocket~~ with a unique indicia matching said referred to unique positional identifier.

Claim 36. (Currently Amended): The method for organizing as set forth in claim 35 further comprising:

providing a first and second set of duplicate stickers matching said unique respective indicia;

placing respective said stickers from said first set on respective said pockets; and  
placing respective said stickers from said second set on said collectible material corresponding with said first set such that said collectible material may be replaced in a preselected pocket having a sticker from said first set after said collectible material has been removed from said preselected pocket by referring to said sticker from said second set on said collectible and locating said preselected pocket having a duplicate sticker from said first set.
